**ELEANOR ROOSEVELT**

Our fully qualified and registered therapist at Serenity, will discuss and advise you on the most suitable treatment for you.

## **ANTI-WRINKLE TREATMENTS**

As a treatment for smoothing wrinkles, botulinium toxin can be used on the forehead to eliminate 'worry' and 'frown' lines as well as around the eyes (crows feet). The effects become apparent in the first three to five days after treatment and last an average of four to six months.

Azzalure (botulium toxin) has been proven to smooth facial lines by paralyzing or weakening muscles that can cause frowning or creasing, therefore decreasing the amount of fine lines, wrinkles and facial creases.

## **DERMAL FILLERS**

The mouth is often the centre of attention and is particularly exposed to ageing both from the elements but also every day when we smile, laugh and talk.

Restylane (dermal fillers) can be used to restore lost volume, smooth out wrinkles or simply enhance your lips or fill out your nose to mouth lines that deepen with age. A Restylane treatment is non-permanent but long lasting and even small changes can make a big difference.
